CONTEST

Hash codes

```
#!/usr/bin/env bash
#Hashes a file, ignoring all:
#   - whitespace
#   - comments
#   - asserts
#   - includes
#   - pragmas
#Use to verify that code was correctly typed.

#usage:
#   chmod +x hash.sh
#   cat a.cpp | ./hash.sh
#or just copy this command:
#   cat a.cpp | sed -r '/(assert|include|pragma)/d' | cpp -fpreprocessed -P | tr -d
    ↪ '[:space:]' | md5sum | cut -c-6
sed -r '/(assert|include|pragma)/d' | cpp -fpreprocessed -P | tr -d '[:space:]' | md5sum
    ↪ | cut -c-6
```

Template

```
#include <bits/stdc++.h>
using namespace std;

int main() {
    cin.tie(0)->sync_with_stdio(0);
    return 0;
}
```

Test on random inputs

```
#!/usr/bin/env bash
#runs 2 programs against each other on random inputs until they output different results
#source: https://github.com/Errichto/youtube/blob/master/testing/s.sh
#usage:
#   chmod +x test.sh
#   ./test.sh
for((i = 1; ; ++i)); do
    echo $i
    ./test.out > in
    diff --ignore-all-space <(./a.out < in) <(./brute.out < in) || break
done
```
